Tour of Silicon Harbor Networking Social at Fortina Restaurant

Join your BOMA colleagues to take a tour of this repurposed building (former Pitney Bowes property) and then network at nearby Fortina Restaurant.

Silicon Harbor offers purposeful design opportunities catering to any industry and their employee's needs. This mixed use, transit oriented development has great proximity to NYC for recruiting and accommodates commuters who train, drive, bike or walk to work. Designed by I.M. Pei and Partners, the building offers vast off set cores, allowing horizontal connectivity floor plans. Silicon Harbors offers purposeful design opportunities catering any industry and their employees' needs. Corporations can also seize opportunities with tax incentives that are offered by CT.

Take the express train from NYC to Silicon Harbor and in 40 minutes arrive at the only urban campus in CT where you can live, work and play on the water without a car. Live on the water and walk out of your apartment to enjoy seasonal events throughout the year. Amenities include an extensive boardwalk that connects a broad range of restaurants, retailers and waterfront activities where residents and tenants are able to run, bike, kayak and boat along the waterfront.
